

## Community Technical Assistance Application Form

This program is designed to provide technical assistance as needed and requested by SRPEDD member communities on local transportation issues that do not need a comprehensive planning study. These projects are typically completed using existing or minimal data collection and through a Technical Memorandum (Tech Memo) to the community which provides an overview of an issue and recommends a variety of solutions from short-term / low-cost solutions to larger, long term recommendations.

City/Town:

Your Name:

Your Title/Role:
